

## Claims

[c1]

1. An aromatic container heater, comprising:
  - (A) a conductor assembly, having a first end and a second end;
  - (B) a first electrical conductor electrically connected to said first end of said conductor assembly;
  - (C) a second electrical conductor electrically connected to said second end of said conductor assembly; and
  - (D) an electrical plug electrically connected to said first electrical conductor and said second electrical conductor.

[c2]

2. An aromatic container heater, as recited in claim 1, wherein said conductor assembly further comprises a conductor.

[c3]

3. An aromatic container heater, as recited in claim 2, wherein said conductor assembly further comprises an insulating cover covering a portion of said conductor.

[c4]

4. An aromatic container heater, as recited in claim 2, wherein said conductor is composed of an electrical conducting material selected from the group consisting of copper, aluminum, tin, silver, gold and alloys thereof.

[c5]

5. An aromatic container heater, as recited in claim 3, wherein said conductor is composed of an electrical insulator selected from the group consisting of plastic, rubber, cloth, paper, glass, mica and combinations thereof.

[c6]

6. An aromatic container heater, as recited in claim 2, wherein said conductor is bendable.

[c7]

7. An aromatic container heater, as recited in claim 2, wherein said conductor is a device selected from the group consisting of a bendable tube, a stranded cable, a mesh, a chain, a thermal polymer and a ceramic tube.

[c8]

8. An aromatic container heater, as recited in claim 1, further comprising a fuse in line with and electrically connected to said plug.

[c9]

9. An aromatic container heater assembly, comprising:

(A) a candle container, having an interior and an exterior;

(B) an aromatic candle within said interior of said candle container;

(C) a conductor assembly, having a first end and a second end, said conductor

assembly wrapped about and in contact with said exterior of said candle container;

(D) a first electrical conductor electrically connected to said first end of said conductor assembly;

(E) a second electrical conductor electrically connected to said second end of said conductor assembly; and

(F) an electrical plug electrically connected to said first electrical conductor and said second electrical conductor.

[c10]

10. An aromatic container heater assembly, as recited in claim 9, wherein said conductor assembly further comprises a conductor.

[c11]

11. An aromatic container heater assembly, as recited in claim 10, wherein said conductor assembly further comprises an insulating cover covering a portion of said conductor.

[c12]

12. An aromatic container heater assembly, as recited in claim 10, wherein said conductor is composed of an electrical conducting material selected from the group consisting of copper, aluminum, tin, silver, gold, nickel, chromium and alloys thereof.

[c13]

13. An aromatic container heater assembly, as recited in claim 11, wherein said conductor is composed of an electrical insulator selected from the group consisting of plastic, rubber, cloth, paper, glass, mica and combinations thereof.

[c14]

14. An aromatic container heater assembly, as recited in claim 10, wherein said conductor is bendable.

[c15]

15. An aromatic container heater assembly, as recited in claim 10, wherein said conductor is a device selected from the group consisting of a bendable tube, a stranded cable, a mesh, a chain, a thermal polymer and a ceramic tube.

[c16]

16. An aromatic container heater assembly, as recited in claim 9, further comprising a fuse in line with and electrically connected to said plug.

[c17]

17. An aromatic container heater assembly, as recited in claim 9, wherein said container further comprises a heat conducting receptacle selected from the group consisting of a jar, glass, cup and bowl.

[c18]

18. An aromatic container heater assembly, as recited in claim 9, wherein said container further comprises a material selected from the group consisting of glass, metal and ceramic.

[c19]

19. An aromatic container heater assembly, as recited in claim 9, further comprising an electric switch electrically connected between said electrical plug and said conductor assembly.

[c20]

20. An aromatic container heater, as recited in claim 1, further comprising an electrical switch electrically connected between said conductor assembly and said electrical plug.
